<https://www.bbc.co.uk/bitesize/guides/zftyxcdm/test> Quick Test

Create a model/story board/series of diagrams to show different glacial features e.g. aretes, pyramidal peaks, moraines. You could even have a go at showing how glaciers move!

Further develop your understanding of this topic by looking at the link below. There are a range of photographs, videos and information.  
<https://www.3dgeography.co.uk/glaciers>

Discover the impacts that climate change is having on glaciers. Research photographs to show changes in glaciers e.g. 100 years ago and today, find graphs and other data. Present this in a format of your choice e.g. A3 sheet, power point, voice recording and show a member of your family.

Discover Antarctica by looking at the weblink below and exploring the clips and reading the information. Explain to a member of your family or a friend what you have discovered, alternatively write it down.
